CASE STUDY

INDUSTRY: TAX & ACCOUNTING

CLIENT

One of largest accounting firms; it has grown substantially over the years through strategic mergers and alliances, thus maintaining a role as a leader in the accounting profession.

EXECUTIVE SUMMARY

The customer wanted to build a custom application (Production Workflow System) for managing projects, tasks and reporting; housed on their intranet. The existing ERP did not have the required business functionality to manage the specific workflow of the customer which hampered timely completion of projects.

TECHNOLOGY

- ASP.net
- C#
- Framework 3.5
- JQuery
- AJAX
- SQL Server 2008
- SSRS

SOLUTION

- Developed a custom web based application using JQuery, A JAX for user interface.
- Batch Job to fetch data from ERP & data warehouse to be pushed into workflow system.
- Spreadsheet type functionality for consolidated view, easy update of data.
- Used Model View Controller Architecture to support large number of concurrent users.
- Home grown agile methodology implemented to address constant changes.

CHALLENGES

- Integration with existing ERP & Data Warehouse
- Constant change in requirements
- Time crunch
